### **QUAD BIKE SAFETY TASKFORCE ISSUES PAPER SUBMISSION**

On behalf of the City of Hobart I write in response to feedback on the Issues Paper, Quad Bike Safety in Tasmania, for potential action to improve quad bike safety in Tasmania.

At present the City uses no quad bikes within its operations. The City does have three 'side by side' utility vehicles utilised within the city to perform maintenance operations where access and manoeuvrability is difficult for a commercial vehicle to access.

There is always the possibility the City may choose to use quad bikes in the future and looks forward to future advice following the deliberation of the taskforce now established.

Yours sincerely

(Glenn Doyle)
